Install Google Fonts Locally

Install Google Fonts Locally

- First, visit Google Fonts and choose one font.
- Copy the url, e.g.: https://fonts.google.com/specimen/Cabin
- Run the `font-installer.sh` script with:
  `bash ./font-installer.sh`

The script automatically downloads and install the font in the
path: `/usr/share/fonts/truetype`

Cabin font

Designed by Impallari Type, Rodrigo Fuenzalida (▸ Google Font > Cabin)
